## WITHOUT CYBERPRINTER

---

Problems could be:

- 1 . **Printout abuse** when users know that there is no control.
- 2 . **High costs** when human control instead of automated one.
- 3 . **Unaccurate** when human control.

## WHAT ELSE TO KNOW?

---

Cyberprinter is printer management software from Serpol Software. Cyberprinter keeps track of data like document name, number of printed pages, date, time, PC name and user name, among other data.

Cyberprinter is capable to monitor one or more printers whether they are laser or inkjet, also compatible with printer servers and remote IP printers. This printer management is an accurate page counter even counting copies of the same document when printed with MS-Word.

Cyberprinter is the only printout counter which is password protected to avoid unauthorized access.

## SERPOL CYBERPRINTER

## SOFTWARE FOR PRINTER MANAGEMENT

---

*Software Solutions, now*

# CYBERPRINTER BENEFITS

These are some of the benefits of our software for printer management or Cyberprinter:

**1 . Lower printout costs** having accurate information on what is printed will let you establish effective controls. The trend of printer manufacturers is to make cheaper hardware but more expensive toner and ink cartridges, abuse patterns can be easily detected with Cyberprinter.

**2 . Low management cost** Cyberprinter stores in a log all the printout information generated by your network, you can export such information to other applications like spreadsheets or databases for report generation. Cyberprinter does not need human intervention to work, once installed information is stored for months.

**3 . Investment protection**, Cyberprinter works for an unlimited number of printers, remote or local, connected to a USB or parallel cable connected, using a wireless network or connected to a printer server. Technology in which is based Cyberprinter makes it possible to work for virtually any printer at the market whether it is laser or inkjet, even will work for any new model that does not exist at the time this brochure was written.

## SUCCESS STORIES

---

Since 2003 several companies around the world had used our software to improve their operations, the cost of Cyberprinter is minimum compared to the benefit received. From America to Europe hundreds of companies are using our software solutions.

*When Job volume and service quality is the daily challenge, Cyberprinter helps us in this commitment. Excellent technical support 100% satisfaction.*

## HOW DOES CYBERPRINTER WORKS?

---

It consists in two applications: One Server on one side and in the other side a client version. Server application is required to be installed at just one PC of the Local Network, remaining PCs require the client to be installed at each of them.

When a printout is done from any of the workstations, data like document name, date, time and user name is logged, such log is saved at the PC where Cyberprinter server is installed.

You can get additional properties from the printed document like paper size or printout color status.

## HOW IS THE LICENSE TO USE CYBERPRINTER

---

*License is flexible depending on local network growing requirements*, One Cyberprinter server per each local network is required, if you need to establish “control points” with an

independent log per each point then you may need one Cyberprinter server per each point.

*Client Licenses*, They are sold by 10 licenses pack, but you can purchase one new license pack when local network grows.

License is a non exclusive right to use Cyberprinter but for you may use it for undefined time. Included with your purchase you get one year of free upgrades, passed that time we offer optional upgrade plans

## WARRANTY

---

We at Serpol Software are aware that each company is different as well as business requirements. Therefore any software title manufactured by us is available for free evaluation for 15 días, enough time to determine software fitness.

## ADDITIONAL SERVICES

---

We can develop extra features at an affordable price, this way you can adjust our software to fit 100% your requirements, please ask for this service.

## HOW MUCH IS WORTH IT?

---

Perhaps we will save you more money than the amount you may pay for our software. Don't wait anymore, ask for a quote today. We will be glad to help you!
